

Explaining MCO

What is MCO?

MCO stands for Maths Curriculum Online. It is a curriculum-aligned online program that makes use of very little data. The program is available for grades 3–7, in both English and Afrikaans.

Why use MCO?

MCO makes your life as a teacher easier. MCO follows the CAPS curriculum and contains questions to encourage learners of all levels. To add to that, it marks the work automatically and gives you and your learners results straight away. By using MCO as a teaching tool, learners are able to practise better understanding of the work.

How do you use MCO?

Each teacher and learner is given a username and password. Both teachers and learners use these unique login details to get to the MCO website.

See *Logging in to MCO* to find out how get to the MCO home page.
